VII. Conclusion

As our Barangay Officials are doing their part to promote a better governance, we adopted a mechanism to keep track of the barangay's productivity and performance through the Barangay Governance Performance Management System. It is a self-assessment tool to measure the capabilities and limitations of the barangay in the delivery of essential public service to the people. Result of this report shall serve as the guiding reference in addressing people's concern along the four (4) Performance Areas: Administration, Social Services, Economic Development and Environmental Management with the corresponding seventeen (17) service areas.

With the attainment of Performance Index of 4, the barangay is compliant to the minimum requirements of 1991 LGC and other laws. The barangay must likewise sustain the good practice in the barangay governance.

Specifically, the barangay obtained a Performance Level of 4 in performance areas Administration. This was represented by color code green based on the BGPMS Scoresheet. Its compliance to the indicators per service area needs to be sustained. However, there is a need for the barangay officials to take into consideration the compliance to the other requirements of the law that were not met under there areas during the year.

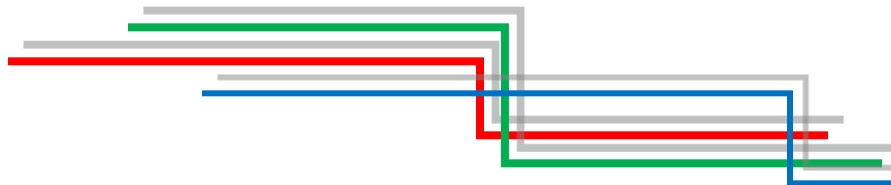

The barangay must likewise sustain the good practices. The barangay officials shall focus on the Entrepreneurship, Business and Industry Promotion to provide livelihood programs that will promote industry among the residents thereby improving family income of the same time. While Barangay Officials are committed to address the various needs of the barangay residents, the utilization of this report shall further guide them in focusing the most needed services that will greatly benefit the community.
